Dirigo Health Agency Determination of Aggregate Measurable Cost Savings (AMCS) Disclosure, June 2, 2008

The Agency is submitting this year's report and supporting documentation on AMCS in electronic format on CD media. The CD accompanying this document includes the Agency's consultants' report, supporting documents, datasets, and all notes, emails, drafts, and other documents the consultants considered.

The CD is organized in this fashion:

There are two folders at the top level of the CD:

- 1) Report and supporting documentation
- 2) Discovery

The "Report and supporting documentation folder" contains the schramm•raleigh Health Strategy (srHS) report to the Dirigo Health Agency (dha_document_01.pdf) as well as all documents srHS relied on or cited in the report. The Agency has labeled these documents "dha_document_01.pdf" through "dha_document_xx.pdf" The folder contains an index to these documents. This index is reproduced below.

In addition, the "Report and supporting documentation folder " contains the datasets and calculation worksheets srHS used in making their AMCS determination. The Agency has labeled these datasets and worksheets as "dha_dataset_xx" and "dha_worksheet_xx" respectively. The folder index also details these files. The Agency is submitting the datasets in the formats srHS obtained and used during their calculation process. The worksheets are all in Microsoft Excel format, and are also contained as appendices in the srHS report.

The "Discovery" folder contains all emails, attachments, drafts, notes, and other documents exchanged between the Agency and its consultants as well as documents the team considered but did not rely upon. Where the Agency has combined these documents into a single file, for example, with email correspondence (dha_discovery_01.pdf), the Agency has Bates stamped each page within the file. The folder contains an index to these files. This index is reproduced below.

The "Discovery" folder also contains three subfolders:

- 1) attachments contains all attachments associated with email correspondence. The folder index details which emails are associated with each attachment.
- 2) insurance company statements contains financial statements in PDF format from Maine insurance companies that are password protected. The password protection makes it impossible for the Agency to merge these documents with larger discovery files. Therefore, the Agency is submitting these files separately.
- 3) spreadsheets and source data contains spreadsheets and other text data files
